The Institute of Experimental Immunology (IEI) at the Faculty of Medicine of the Rheinische Friedrich Wilhelms-University Bonn invites applications for a

**Junior Research Group Leader (TV-L14)**

The position is initially limited until 31.12.2019 with a tenure option upon positive evaluation by the faculty of Medicine.

The five research groups at the IEI focus on the investigation of the mechanisms underlying immune-mediated diseases and of anti-infectious defense. The junior research group will be embedded into this lively immunological community and collaborate with the DFG Excellence Cluster “ImmuoSensation”, other Collaborative Research Centers and the university clinic of Bonn University.

The junior research group is intended to strengthen our expertise in state-of-the-art techniques such as intravital 2-photon microscopy, generating genetically modified mice or bioinformatic data analysis. Funded will be the positions for the Group leader, a PhD and a technician and consumables.

Required is a PhD in Biology, Molecular Biomedicine or in a similar field. The ideal candidate possesses a keen interest and a published track record in immunological research, is eager to collaborate and capable of integrating into the successful immunologic research environment in Bonn.

The University Hospital of Bonn is an equal opportunity employer.

Qualified candidates should submit their application including motivation letter, curriculum vitae and list of publications within **December 17th 2017** to:
