

Deniz Karabag, MSc.

German Center for Neurodegenerative Disorders

PhD candidate

E-Mail: Deniz.Karabag@dzne.de

Research Expertise

Before Deniz started as a PhD candidate in the lab of Prof. Heneka, he studied a Research Master in Fundamental Neurosciences at the University of Maastricht. As part of his internship, he investigated the contribution of tethering proteins to the axon-myelin synapse pathology in Multiple Sclerosis at the VU Medical Center in Amsterdam. He is mainly interested in neurodegenerative, neuroimmunological and neurological disorders and injuries. As a PhD candidate in our lab, he can perfectly combine his research interests by investigating the role of the NLRP3 inflammasome in relation to tauopathies.

Education / Training

University of Maastricht, Netherlands, Fundamental Neuroscience, MSc, 2019
VU Medical Center, Amsterdam, Intern, 2018
University of Maastricht, Netherlands, Psychology and Neuroscience, BSc, 2017

Appointments / Positions Held

2020-2023
PhD candidate at the German Center for Neurodegenerative Diseases,
University of Bonn
