

Tatsuya Manabe, MSc

Rheinische Friedrich-Wilhelms-Universität Bonn

PhD candidate

E-Mail: tatsuya.manabe@ukbonn.de

Research Expertise

Tatsuya Manabe received a BSc (Hons) in Neuroscience at King's College London in 2016 and an MSc in Dementia at University College London in 2017. He has subsequently joined Heneka lab as a PhD student since 2017. He has been fascinated with the significant roles of the innate immunity in neurodegenerative diseases such as Alzheimer's disease. His current interest focuses on the microglia-synapse interactions and innate immune memory in particular after the systemic inflammation, on the basis of which he has been working for the sepsis-associated encephalopathy project.

Education / Training

University College London, UK, MSc in Dementia, 2017

King's College London, UK, BSc (Hons) in Neuroscience, 2016

University of Nagoya, Japan, Internship, 2016

Appointments / Positions Held

2017 - present

Research assistant in the Universitätsklinikum Bonn, University of Bonn
