Research Expertise

Charlotte Geck spent six months at the “Laboratory of Tissue Repair and Regeneration” in Toronto investigating cell-cell connections between macrophages and fibroblasts in a profibrotic context. At the German Center for Neurodegenerative Diseases, she is now involved in fundamental research focusing on cellular interactions between neurons and microglia.

Education / Training

Reutlingen University, Germany, B. Sc. Biomedical Sciences, 2017-present

Appointments / Positions Held

10/2020 – present

Bachelor student at the German Center for Neurodegenerative Diseases, Bonn

08/2019 – 01/2020

Intern at the Laboratory of tissue Repair and Regeneration (University of Toronto), Toronto, Canada

Honors / Awards

2019
Globalink Research Award, Mitacs
