

Call for Master's thesis in the field of Psychology and ADHD @work

Dear Students

Our research group Virtual Reality Therapy and Medical Technology (Head: Dr. Niclas Braun) at the Department of Psychiatry and Psychotherapy (Director: Prof. Dr. Alexandra Philipsen) is offering one to two Master or med. Doctorate thesis projects on **a systematic review and meta-analysis of ADHD @work**.

Short Description:

- Diagnosed individuals with ADHD often show strengths such as innovation, risk-taking, and creativity, alongside workplace challenges including impulsivity, time management difficulties, and stress regulation (Hutson, 2024).
- Although clinical interest is growing rapidly, there is still limited evidence on which training formats are most suitable for therapeutic use to help individuals with ADHD thrive @the workplace.
- The aim of these Master's / medical doctorate thesis projects is therefore to conduct a systematic review and meta-analysis on trainings for individuals with ADHD in work settings.

Tasks:

- Planning and conducting a comprehensive literature search
- Performing a systematic review according to established methodological standards (e.g., PRISMA)
- Executing a meta-analysis of existing empirical studies on trainings for ADHD in work contexts
- Contributing to the development of an evidence-based framework for successful training

Ideal Applicant Profile:

- Master's or medical doctorate student (e.g., psychology, medicine, business or related fields)
- Familiarity with, or strong interest in ADHD disorder/ psychiatry and psychotherapy
- Very good command of German and English
- Independent, well-organized, and reliable working style
- High motivation for academic writing, evidence synthesis, and analytical work
- Preferred: Experience with systematic reviews, meta-analytic methods, or statistical data analysis

Application:

Applicants with disabilities will be given preference if equally qualified, capable, and professionally competent. We look forward to receiving your application. Please submit your application, including the usual documents (cover letter, copies of certificates, CV), electronically to:
